

CLAIMS

I claim:

1. A tool and extension therefor comprising:

a tool handle, said handle having an outer surface, a proximate end and a distal end;

a tool head, said tool head secured to said proximate end of said handle;

first screw threads disposed on said outer surface of said handle at said proximate end adjacent said tool head;

second screw threads disposed on said outer surface of said handle at said distal end; and

an extension member disposed on said handle for telescopic movement thereon.

2. A tool and extension therefor as recited in claim 1, wherein said second screw threads are identical to said first screw threads.

3. A tool and extension therefor as recited in claim 1, wherein said extension member is a hollow tube having a first end and a second end.

4. A tool and extension therefor as recited in claim 1, wherein said extension member is a hollow tube having a closed first end and an open second end.

5. A tool and extension therefor as recited in claim 4, wherein said open second end has an inner surface and wherein screw threads are disposed on said inner surface.

6. A tool and extension therefore as recited in claim 5, wherein said tool is a wrench.

7. A tool and extension therefore as recited in claim 1, wherein said tool is a wrench.

8. A tool and extension therefor comprising:

a tool handle, said handle having an outer surface, a proximate end and a distal end;

a tool head, said tool head secured to said proximate end of said handle;

first screw threads disposed on said outer surface of said handle at said proximate end and adjacent said tool head;

second screw threads identical to said first screw threads disposed on said outer surface of said handle at said distal end; and

an extension member having a closed first end and an open second end, said extension member disposed on said handle for telescopic movement thereon.

9. A tool and extension therefor as recited in claim 8, wherein said extension member has an outer roughened surface to enhance gripping.

10. A tool and extension therefor as recited in claim 8, wherein said open second end has an inner surface and wherein third screw threads are disposed on said inner surface.

11. A tool and extension therefore as recited in claim 10, wherein said third screw threads match said first and said second screw threads.

12. A tool and extension therefore as recited in claim 11, wherein said tool is a wrench.
